e-news letter

As the school reconvenes after a much-needed summer respite, it remains imperative to acknowledge the profound significance of these holidays in the lives of our students. Summer holidays are invaluable beyond academic learning. These breaks provide an excellent opportunity for children to immerse themselves in various extracurricular

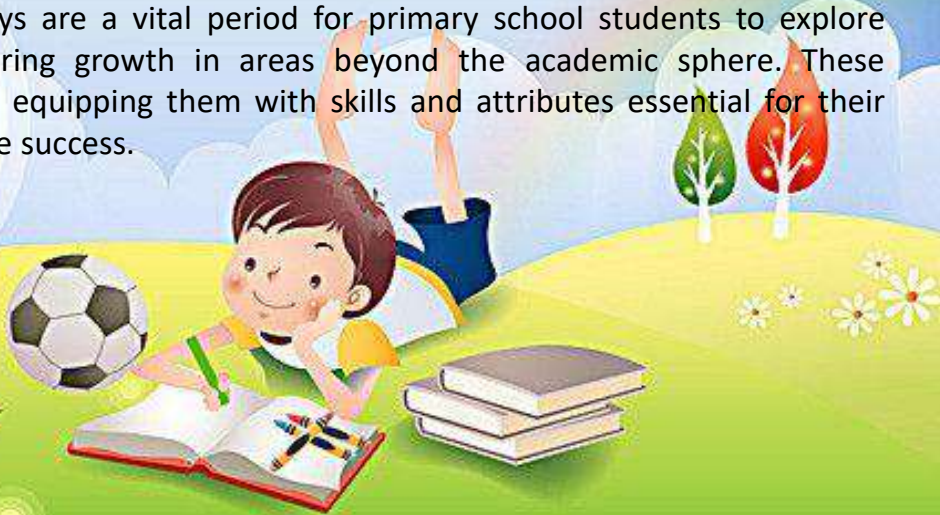

activities, which are crucial for their holistic development. Engaging in sports, arts, and other hobbies fosters physical fitness, creativity, and emotional well-being.

Sports activities, for instance, not only improve physical health but also teach essential life skills such as teamwork, discipline, and perseverance. Participation in art and music can ignite creativity, enhance fine motor skills, and provide a medium for self-expression. Additionally, drama and dance classes can boost confidence, improve communication skills, and encourage cultural appreciation.

Summer holidays also allow children to explore and develop new interests. Whether it's learning a new instrument, delving into a new sport, or participating in community service, these experiences cultivate a well-rounded personality and broaden their horizons. Furthermore, engaging in diverse activities helps children discover their passions, build resilience, and develop a sense of independence.

In conclusion, summer holidays are a vital period for primary school students to explore extracurricular pursuits, fostering growth in areas beyond the academic sphere. These experiences enrich their lives, equipping them with skills and attributes essential for their overall development and future success.

MY AMAZING PARENTS

My parents are everything to me. They do everything to keep me healthy, safe and happy. Papa and I play together. He tells me a story before sleeping every night. Mamma gives me a bath every day. My parents are like my friends. They teach me important things like to be independent, respect elders and love young ones. They are always there for me. I have the best parents in the whole world. I love them very much.

MY FIRST DAY OF CLASS 1 AT RKC

On my first day of class 1 at RKC, I was very excited. With a bag on my shoulder, I stepped into my classroom. I made new friends. The classroom was big. There were colourful posters of alphabets and numbers on the wall. My class teacher helped me settle into the new environment. During break time, I shared my food with my new friends. We played and laughed together. As the day came to an end, I waved goodbye to my friends, and I was excited to meet them again tomorrow.

MY SUMMER VACATION

I enjoyed my holidays. I spent my days playing with my cousins. I have also learnt new skills. I have started learning skates . I have in-line skates. I go to class every day. I have made two friends in the class. My goal is to get professional skates training by an expert and to participate in the National Skating Competition.

I have also joined Robotics class where I had learnt to make various things that were controlled by remote .

I also studied for my upcoming spell quest examination.

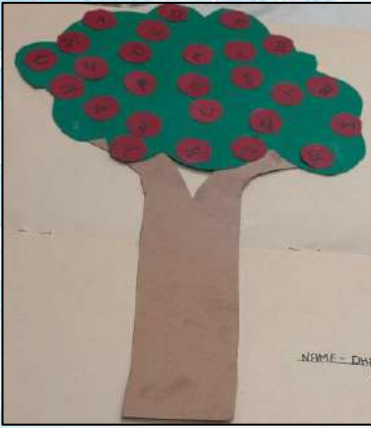

I am excited to come back to school and meet my friends and tell them about my summer vacation explorations.

A TRIP TO KASHMIR

In my summer vacation we have planned a trip to Kashmir. We have reached Kashmir valley via New Delhi from Raipur. The view of the snowcapped mountains increased my excitement further. The first two days we have spent our time at Srinagar visiting the famous Dal Lake, enjoying Shikara ride.

Our next two days were for Gulmarg, one of the most beautiful tourist destinations. Snowcapped mountains all around increases the beauty of this destination. We went to one of these mountains through gondola ride. We enjoyed pony ride, snow and other snow activities there.

Our trip ended with our flight back to Raipur but the enchanting natural beauty of Kashmir, the hospitality and the security leaves me wandering and excited about our next trip to Kashmir.

Band of Colours

Rainy day, rainy day,
So much fun, what to say,
I love dancing in the rain,
Joy has filled in my veins,
While standing on the sand,
I can see the colour band,
In the sky, like a slide,
Coming down on my side,
are the rivers of seven colours
violet, indigo, blue, green,
yellow, orange and red,
Making me jump on my head
Oh! My dear rainbow, don't you ever go away,
Just by looking at you makes my day.

An Unsolved Thought

The ocean has depth,
And is a mysterious place,
Where all marine life,
Are yet to be discovered .
We absolutely know nothing
Is it a gloomy or jubilant place.
Why are you unknown,
Do you fear something ,
Speak to me oh mighty ocean,
For you are my only hope,
To be the person I wished for,
Help me listen to my cry,
Or you will always be mysterious like this.

Little Things

In little things, true joy we find,
A simple truth, in every kind.
A sunray touch, a friendly smile,
They make our life worthwhile.
The song of birds at break of day,
A cup of tea, a child's play.
These tiny treasures all around,
In them, happiness is found.
So let's embrace each little grace,
In life's small moments, we'll find our place.
For joy resides in simple wings,
In finding wonder in the little things.

Faculty Development Program

The faculty development program aimed to provide guidance and set expectations for the teachers. **Maharajadhiraj Dr. Aditya Pratap Deo of Kanker, Life Member, General Council**, an experienced educator, led the program, sharing his insights and expertise. During the program, Prof. Deo emphasized the crucial role teachers play in shaping young minds and nurturing the future generation. He highlighted the need for teachers to be knowledgeable, patient, and passionate about their profession.

The faculty development program was comprehensive, involving not just expert sessions but also hands-on workshops led by the school's own teachers. The English and Hindi department teachers collaboratively conducted a workshop focused on interdisciplinary teaching approaches.
